

SHARP

XE-A202

The UK's number one* electronic cash register brand proudly presents the new XE-A202.

- ✓ Versatile, easy to use, self-contained terminal
- ✓ Fast, quiet thermal printing
- ✓ Large, lockable cash drawer for maximum security

SHARP

FOCUS ON

XE-A202

The Sharp XE-A202 electronic cash register is versatile, fast and very simple to use, no matter what the application.

This self-contained, multi-purpose machine features a "drop-in roll" thermal printer that produces around 10 lines per second. Not only is this much faster than a conventional printer, it is a lot quieter and helps you communicate a professional image to your customers at all times.

Easy to maintain, the printer uses wide thermal paper so your receipts carry all the information your customers require. With an electronic journal storing up to 2,000 lines of data for your records, there is no need to mess about with two-ply paper.

There are 99 departments and a maximum of 1,200 PLUs as standard on this clever, attractive terminal that is designed with typical Sharp thoroughness for greater ease of use and efficiency.

A pop-up customer display has large, clear LED segments that clearly show all transaction data to your customers at the point of purchase.

And to complete the stunning picture, the XE-A202 has a spacious, secure drawer for maximum security.

* Independently verified by Clarendon Reports 2003, which also confirmed Sharp was number one for product quality.

Other top features
